

Santino Giordano

Software Engineer / Graphic Designer

PROFILE

I am a motivated and creative software engineer, who graduated from Our Lady Of the Elms College with a bachelor's degrees in Computer Science and Graphic Design. I am driven with the pursuit of learning new and innovative tools and technologies, to help advance my career as a software engineer.

EXPERIENCE

Meditation E-Commerce Website, Lee MA—Website Developer

9/2025 - 10/2025

Build a live e-commerce website using stripe. Orders are automatically mailed to customers using nodemailer and stripe to fulfill successful payment intent. ([Meditation Website](#))

Elite Tree And Snow LLC, Agawam MA—Website Developer

6/2025 - 7/ 2025

A contracted tree/stump removal website that was developed and deployed on Vercel. [Elite Tree & Snow](#) simple and efficient website that uses resend E-mailer to connect clients to the service.

ATP ExPhys LLC, Great Barrington MA—Website Developer/Graphic Designer

12/2023 - 8/2024

Developed and deployed a Next.js website ([ATP Exphys](#)) It was managed and updated regularly. The Domain was acquired from "NameCheap" and hosted with "Vercel." The website is also set up with "Google Search Console" to monitor foot traffic of the website.

EC Graphic Design Internship, Chicopee MA — UX/UI Designer

5/2023 - 7/2023

5/2022 - 7/2022

Learned invaluable tools for design elements with the Adobe Suite. Familiarized myself with logo design, color theory, and typography, which all culminates in my css/tailwind styling.

Our Lady of the Elms, Chicopee Ma — *Bachelor's of Computer Science*

6/2020 - 4/2024

Our Lady of the Elms, Chicopee Ma — *Bachelor's of Graphic Design*

6/2020 - 4/2024

Professional Portfolio

Professional Portfolio — [Portfolio](#)

My Professional Portfolio Site is the landing page deployed on vercel, for all works I've done and shows everything from my graphic design to my full stack web applications.

PROJECTS

Indie Movie Theater [Theater Site Project](#)

This site is a fake independent movie theater site that I created. There is a full auth system, as of right now theres no way to buy tickets or food online, but i plan to work more on this and add a credit system that keeps track of rewards, and who is logged in with zustand.

141 Main Grill Recreation — [Main Grill](#)

This was a local restaurant near me ([original site](#)) that in my own time I took to recreating in my own vision. The website was overhauled, updated and styling changed.

HS Volleyball Tracker — [Statsheet](#)

Created during my 2025 coaching season, this was used professionally to contribute to accurate stat collection for my volleyball team, and used to contact masslive with PDF's of the data. This is where that stats were sent to: [MassLiveStats](#)

Word Guessing App — [Game](#)

A fun game with a working user authentication system. The Leader board system currently is not working. The score sets itself as a value, it doesn't add itself as a value Words / guesses / users are held in collections in mongo. A simple project with a lot of fun.
