

SANTINO GIORDANO

Springfield, MA | 413-285-6188 | santinogiordano13@gmail.com | [Portfolio](#)

PROFILE

Computer Science and Graphic Design graduate with experience building responsive web applications using Next.js, React, TypeScript, and Tailwind CSS. Experienced in developing full-stack applications, integrating third-party services such as Stripe, and deploying production websites using Node.js, Express, and Vercel. Strong focus on user experience, performance, and scalable web architecture.

SKILLS

Programming Languages: JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: Next.js, React, Tailwind CSS, Node.js, Express, Go (Fiber)

Tools & Platforms: Git, Vercel, Visual Studio Code, MongoDB, Adobe Creative Suite

Design: UX & UX/UI Design, Responsive Design, SEO Optimization

Other: Rapid Learning of New Technologies, Godot Engine

WORK EXPERIENCE

Freelance Work - FullStack Developer | *worked for different companies as a fullstack/frontend developer*

Aug 2023 - Present (3yrs 11 months)

([Link](#)) Currently, I'm working with the legacy IAABO's website and rebuilding it from the ground up. The site has already undergone major SEO improvements, including updated metadata and content optimization, resulting in a 100% score in Google Lighthouse. These changes have also improved its visibility in search results. Right now, I'm using HTML and CSS to modernize the site's overall structure, layout, and flow. At the same time, I'm gradually converting the older legacy codebase into Next.js and TypeScript to bring the project onto a more modern stack with stronger maintainability and scalability. On the backend, I built a full custom CMS from the ground up. It manages and serves the site's dynamic content, including; dates, names, locations, announcements, and events. Because of this CMS-driven structure, the website is highly flexible, content can be updated, reorganized, and expanded without needing to rewrite the frontend.

([Link](#)) I developed and deployed a website for Elite Tree and Snow LLC to establish their online presence and improve customer engagement. The site was built using Next.js and TypeScript, with Tailwind CSS and DaisyUI used to create responsive and visually consistent components. I implemented a contact page using the Resend API to enable direct communication between customers and the business. The website was deployed on Vercel, providing reliable and efficient hosting for the frontend.

([Link](#)) Additionally I worked with ATP ExPhys LLC from the ground up using Next.js, TypeScript, and Tailwind CSS. The site was deployed using Vercel and managed with Git for version control. To support business growth and visibility, I integrated Google Search Console for tracking website performance and traffic metrics. I also implemented a contact system using NodeMailer, allowing users to send messages directly to the company's business email.

EDUCATION

Our Lady of the Elms

Bachelor of Science in Computer Science

Bachelor of Arts in Graphic Design

Chicopee, MA | Jun 2020 – Apr 2024

PROJECTS

Professional Portfolio - [Link](#)

- Built a responsive cinema website using Next.js, React, and Tailwind CSS.
- This is a collection of all my works in both software development and Graphic Design.

Indie Movie Theater Platform - [Link](#)

- Built a responsive cinema website using Next.js, React, and Tailwind CSS.
- Implemented authentication with NextAuth and Zustand for session management.
- Designed the architecture for a future credit-based rewards system.

141 Main Grill Website Recreation - [Link](#)

- Rebuilt a restaurant website using Next.js and modern responsive design principles.
- Deployed the site on Vercel to ensure reliable performance across devices.

High School Volleyball Tracker - [Link](#)

- Created a statistics tracking application used during the 2025 volleyball season.
- Generated PDF reports of player statistics that were submitted to MassLive.
